

## Medical: Animal and Human Bites

### EMR

- Scene Safety
- ABCs and Vital Signs
- Airway management with **oxygen** maintaining a SaO<sub>2</sub> of 94-98% through titration
- Control any serious bleeding
- Wash area gently
- Remove jewelry from the affected limb before swelling begins, if possible
- Apply an Ice pack to the affected area to slow swelling, (do not apply directly to skin)

### EMR STOP

### EMT

- Consider administration of \***Nitrous Oxide** for pain and anxiety
- Consider **Ibuprofen** 600 mg PO for pain, 10 mg/kg for pediatrics.

### EMT STOP

### EMT IV

### ADVANCED EMT

- Venous access

### EMT IV / ADVANCED EMT STOP
